

Fact sheet

# The definitive resource for trusted Open Access

**Helping the research  
community discover,  
evaluate and access  
high-quality Open  
Access content.**

Renowned for our editorially curated collection of the highest-quality publications, *Web of Science* has always been and will remain publisher-neutral, delivering the most thorough discovery of trusted Open Access (OA), and providing links to free full-text via the publisher's website or trusted repositories.

## 5,000+ OA journals

curated by our in-house editorial team and our trusted partners.

## 12 Million

peer-reviewed Open Access versions, including Gold and Green.

## 23%

of journal articles in *Web of Science* over the past 5 years have a free version available.

### An unbiased view of Open Access:

- Discover and access trusted peer-reviewed Open Access (OA) with confidence – and find non-predatory OA journals to publish in.
- Extend your full text budget with seamless access to millions of trusted OA articles.
- Understand the impact of your institution's investment in OA.

### Beyond Open Access – one-click to subscribed full text PDFs

*Kopernio*, powered by *Web of Science*, helps you expand the reach and budget of your library by giving your users one-click access to your full-text subscriptions from anywhere.

### An open partner for Open Access

Through cutting-edge collaboration – in a novel public/ private partnership, *Clarivate Analytics* joined with *Impactstory*, a non-profit organization devoted to making science more open and reusable, to achieve the goal of making OA content easier to discover.

Today, *Web of Science* is using the enhanced OA identification technology from *Impactstory*.
